

Frameless Far-Infrared Mirror Panel Family

About Our Product Range:

Frameless Far-Infrared Mirror Panel

Available in round* or square build; with or without LED

Our stylish, frame-less, mirrored infrared heaters are a perfect way to incorporate both a mirror and a heated panel, into one product.

With its IP65 rating, the panel is dust tight and is protected against water sprays. Making it an ideal solution for the bathroom with great durability.

Their unique anti-misting properties and polished edges, prevents any rusting on the mirror. Keeping it clean and looking as good as new when it's used.

By using the latest technology in the manufacturing process of glass mirrors, they are strong and sturdy with a tempered and toughened glass front.

Our frameless mirror panels are available in both a round or square build; available in 350watt or 500w sizes.

Manufacturer Material Specification

Surface Design:	Frameless Titan Glass Mirror with Polished Edge
Heating Element:	Carbon Crystal Nanotech Ink
Material:	Premium Frameless 5mm Glass Mirror With Polished Edge
Construction:	Tempered & Toughened Two-way Glass Mirror
Fixings:	Wall
Connection:	2-metre cable
Service Life:	20 Years
Warranty:	10 Years **Conditions Apply
IP Rating:	IP65
